VDH Technical Services Engineers
OEHS Staff

Attached is a table with revised area assignments for the Technical Services Engineers to reflect the current staff. Projects that are in process (plans submitted) will be completed by the current engineer, but future projects should be directed to your new assigned engineer.

The engineers have been assigned by districts. The exception to this is Three Rivers. The Three Rivers Health District has a very high volume and that district has been split by county between the three engineers.

Each district has been assigned a primary, or lead, engineer as well as a backup engineer. The primary engineer should be contacted first, but in his absence, the backup engineer should be contacted. Please contact Marcia Degen, Environmental Technical Services Administrator, at marcia.degen@vdh.virginia.gov, if there are any concerns or questions that can't be resolved through your assigned engineer.

Please remember that all plans that are submitted for engineering review should be accompanied by the receipt date and due date; EHS comments; and 17A checklist.
